Enterprise Architect (m/f/d)

Location: Berlin or Kassel
Type: permanent

IN SHORT

To support our team in IT Strategy, Enterprise Architecture & Data Governance, we are currently looking for an experienced computer scientist (m/f/d) for the implementation of overarching policies, standards, and strategic guidelines regarding the technological development of the entire company. In this newly created position, you will have a lot of flexibility for shaping and play an active role in the realignment of the SEFE Group.

WHAT YOU WILL DO

- Developing and communicating a comprehensive architecture in close alignment with the company's overall business and IT strategy, taking into account stakeholder buy-in
- Defining, promoting and managing overarching policies, standards and strategic guidelines for technological development
- Performing gap analyses between the current and target architecture and outlining transformation initiatives
- Collaborate with other architects (e.g. application architects, data architects and security architects) to ensure that the overall enterprise architecture is coherent and comprehensive
- Define and implement a consistent and reliable process to manage, review and improve the enterprise architecture
- Identify and evaluate new technologies that could add value to the organization and develop and present compelling recommendations for implementation

WHAT YOU WILL BRING

- University degree in a relevant field, e.g. computer science or information technology or equivalent professional experience
- Several years of professional experience in a comparable function with proven experience in the development and implementation of enterprise architectures
- Knowledge and experience in using EAM tools (e.g. LeanIX) and experience with system integration
- Strong analytical and problem-solving skills to analyze complex systems and processes
- Excellent English language skills and the ability to communicate complex technical concepts clearly and persuade stakeholders at all levels of the organization
- Relevant certifications, e.g. TOGAF

ABOUT US

Securing Energy for Europe – it's a simple statement, with a bold ambition. SEFE is not just our name, but also encompasses everything that drives us. To accomplish this, we're taking immediate action to secure gas supply – but also looking forward, to explore our role in the European energy transformation and how we can contribute to a stable and sustainable future.

As a fully-integrated energy company, we serve our customers with an end-to-end energy value chain – from sourcing and trading to transport, storage and sales. Together, we ensure the security of gas supply in Germany and Europe and drive the green energy transformation. Our international teams work across locations in Europe, Asia, and North America. We're passionate about energy and the important role it can play in shaping a better future.

Join SEFE and help us secure gas supply across Europe and shape a better, more sustainable tomorrow.

OUR BENEFITS

We're committed to creating an inclusive environment that embraces diversity and fosters the development of knowledge, skills and experience. Whatever your role, you'll find an open, welcoming atmosphere that empowers you, and recognises your contribution. Right from the start, we offer you a great freedom of action and early assumption of responsibility in an exciting international working environment. In addition to targeted support for your professional and personal qualifications, you will receive numerous company benefits, such as:

- Flexible working hours with the option of hybrid working
- Attractive remuneration package
- Attractive working environment in a central location
- Team-oriented environment with an open feedback culture
- Company restaurant with a healthy and varied selection of food
- Job ticket and bike leasing
- Health provision and company sports offers
- Company pension scheme
- 30 vacation days and special leave
